CHILD NUTRITION ASSESSMENT REPORT

1. Child Information

Parameter	Value
Age	120 months
Weight	30.00 kg
Height	135.00 cm
MUAC	18.00 cm
BMI	16.46

2. Malnutrition Prediction

Predicted Risk: Moderate Malnutrition

Prediction Probabilities

Class	Probability
Normal	0.00%
Moderate Malnutrition	100.00%
Severe Malnutrition	0.00%

3. Personalized Food Recommendations

Food	Calories	Protein	Iron	Calcium
mustard greens cooked	36	3.6	1.2	165.2
okra cooked	35	3.0	0.4	123.2
chickpeas cooked	269	14.5	4.7	80.4
lentils cooked	230	17.9	0.5	0.077
chaptti roti indian bread	491	7.0	0.0	0.0

4. Recommended Food Images

No matching Indian food images were found for the recommended foods.

7. Prevention Advice

• Provide a balanced diet containing adequate protein, energy, fruits, vegetables, and whole grains.

• Include protein-rich foods such as lentils, chickpeas, pulses, dairy products, eggs, or other suitable protein sources.

• Include iron-rich foods such as lentils, chickpeas, leafy green vegetables, and other iron-containing foods.

• Include vitamin- and mineral-rich vegetables and fruits regularly.

• Ensure adequate water intake throughout the day.

• Monitor the child's weight, height, BMI, and MUAC regularly.

• If poor growth, reduced appetite, weakness, or other concerning symptoms are observed, consult a qualified healthcare professional or nutritionist.
